

21 Hour PSFA Objectives

1. Identify the role of the public safety First-aid provider;
2. Demonstrate skills and knowledge related to personal safety, scene size-up, body substance isolation, PPE disposal, and legal considerations;
3. Explain how EMS access works and integrates with EMS personnel to include active shooter incidents;
4. Identify minimum equipment and First-aid kits;
5. Evaluate and treat patients suffering from heart attack and sudden cardiac arrest, and respiratory and circulatory systems issues;
6. Identify and utilize the six links in the Chain of Survival;
7. Complete an American Heart Association (AHA) BLS course that includes CPR and AED for adults, children, and infants, following current AHA guidelines for CPR and ECC at the healthcare provider level;
8. Perform a primary and secondary assessment, and obtain a patient history;
9. Distinguish between medical and traumatic emergencies;
10. Treat medical emergencies such as chest discomfort, breathing difficulty, allergic reactions and anaphylaxis, altered mental status, diabetic emergencies, seizures, alcohol and drug emergencies, severe abdominal pain, obstetrical emergencies, burns, facial injuries, objects or chemicals in the eye, nosebleeds, dental emergencies, and environmental emergencies;
11. Administer oral glucose and Naloxone;
12. Identify and treat victims of poisoning and exposure to chemical, biological, radiological, or nuclear substances;
13. Identify signs and symptoms of psychological emergencies;
14. Move patients safely under a variety of circumstances using different techniques and devices;
15. Determine treatment priorities;
16. Apply tactical and rescue First aid principles to violent circumstances; and
17. Describe and apply principles of tactical casualty care.

24 Hour PSFA Objectives

1. Identify the role of the public safety First-aid provider;
2. Demonstrate skills and knowledge related to personal safety, scene size-up, body substance isolation, PPE disposal, and legal considerations;
3. Explain how EMS access works and integrates with EMS personnel to include active shooter incidents;
4. Identify minimum equipment and First-aid kits;
5. Evaluate and treat patients suffering from heart attack and sudden cardiac arrest, and respiratory and circulatory systems issues;
6. Identify and utilize the five links in the Chain of Survival;
7. Complete an American Heart Association (AHA) BLS course that includes CPR and AED for adults, children, and infants, following current AHA guidelines for CPR and ECC at the healthcare provider level;
8. Perform a primary and secondary assessment, and obtain a patient history;
9. Distinguish between medical and traumatic emergencies;
10. Treat medical emergencies such as chest discomfort, breathing difficulty, allergic reactions and anaphylaxis, altered mental status, diabetic emergencies, seizures, alcohol and drug emergencies, severe abdominal pain, obstetrical emergencies, burns, facial injuries, objects or chemicals in the eye, nosebleeds, dental emergencies, and environmental emergencies;
11. Administer oral glucose and Naloxone;
12. Identify and treat victims of poisoning and exposure to chemical, biological, radiological, or nuclear substances;
13. Identify signs and symptoms of psychological emergencies;
14. Move patients safely under a variety of circumstances using different techniques and devices;
15. Determine treatment priorities;
16. Apply tactical and rescue First aid principles to violent circumstances; and
17. Describe and apply principles of tactical casualty care.

8 hour PSFA Renewal Objectives

1. Identify the role of the public safety First-aid provider;
2. Demonstrate skills and knowledge related to personal safety, scene size-up, body substance isolation, PPE disposal, and legal considerations;
3. Evaluate and treat patients suffering from heart attack and sudden cardiac arrest, and respiratory and circulatory systems issues;
4. Identify and utilize the five links in the Chain of Survival;
5. Complete an American Heart Association (AHA) BLS course that includes CPR and AED for adults, children, and infants, following current AHA guidelines for CPR and ECC at the healthcare provider level;
6. Distinguish between medical and traumatic emergencies;
7. Treat medical emergencies such as chest discomfort, breathing difficulty, allergic reactions and anaphylaxis, altered mental status, diabetic emergencies, seizures, alcohol and drug emergencies, severe abdominal pain, obstetrical emergencies, burns, facial injuries, objects or chemicals in the eye, nosebleeds, dental emergencies, and environmental emergencies;
8. Administer oral glucose

11 hour PSFA Renewal Objectives

1. Identify the role of the public safety First-aid provider;
2. Demonstrate skills and interpret information related to personal safety, scene size-up, body substance isolation, PPE disposal, and legal considerations;
3. Evaluate and treat patients suffering from heart attack and sudden cardiac arrest, and respiratory and circulatory systems issues;
4. Identify and utilize the five links in the Chain of Survival;
5. Complete an American Heart Association (AHA) BLS course that includes CPR and AED for adults, children, and infants, following current AHA guidelines for CPR and ECC at the healthcare provider level;
6. Distinguish between medical and traumatic emergencies;
7. Treat medical emergencies such as chest discomfort, breathing difficulty, allergic reactions and anaphylaxis, altered mental status, diabetic emergencies, seizures, alcohol and drug emergencies, severe abdominal pain, obstetrical emergencies, burns, facial injuries, objects or chemicals in the eye, nosebleeds, dental emergencies, and environmental emergencies;
8. Administer oral glucose and Naloxone

AHA BLS and First Aid Objectives

1. Complete an American Heart Association (AHA) BLS course that includes CPR and AED for adults, children, and infants, following current AHA guidelines for CPR and ECC at the healthcare provider level including:

- a. Describe the importance of high-quality CPR and its impact on survival;
- b. Describe all the steps in the Chain of Survival;
- c. Apply the BLS concepts of the Chain of Survival;
- d. Recognize the signs of someone needing CPR;
- e. Perform High-Quality CPR for an adult, a child, and an infant;
- f. Describe the importance of early use of an automated external defibrillator (AED);
- g. Demonstrate the appropriate use of an AED;
- h. Provide effective ventilation by using a barrier device;
- i. Describe the importance of teams in multirescuer resuscitation;
- j. Perform as an effective team member during multirescuer CPR; and
- k. Describe the technique for relief of foreign-body airway obstruction for an adult, a child, and an infant

2. Complete an American Heart Association (AHA) Heartsaver First Aid course that includes, First Aid Basics, Medical Emergencies, Injury Emergencies, and Environmental Emergencies, following the current AHA and ECC guidelines including:

- a. List the Priorities, roles, and responsibilities of first aid rescuers;
- b. Describe the key steps in first aid;
- c. Demonstrate removing protective gloves;
- d. Demonstrate finding the problem;
- e. Describe the assessment and first aid actions for these life-threatening conditions: heart attack, difficulty breathing, choking, severe bleeding, shock, and stroke;
- f. Describe when and how to help a choking adult, child, or infant;
- g. Demonstrate how to help a choking infant;
- h. Demonstrate how to use an epinephrine pen;
- i. Demonstrate how to control bleeding and apply bandaging;
- j. Recognize elements of common illnesses and injuries;
- k. Describe the benefits of living a healthy lifestyle and the risks of smoking and vaping;
- l. Describe how to find information on preventing illness and injury; and
- m. Recognize the legal questions that apply to first aid rescuers.

Santa Barbara County Naloxone

1. At the conclusion of the course, students will be able to:
2. Evaluate and treat patients suffering from a suspect opioid overdose;
3. Artificially ventilate a patient as needed;
4. Identify the correct treatment modalities of a opioid overdose;
5. Perform the 5 rights and/or DICCE of the drug Naloxone;
6. Administer Naloxone as per assessment and county policies;
7. Provide post administration care to a patient of a suspected opioid overdose.
